

Customize 4th Quarter® To Run Your Business The Way You Want

Braided Matrix, Inc. is ready to help you customize 4th Quarter Accounting Solution to suit your unique business needs.

Our personalized service extends beyond tech support. While most software companies simply sell their product, our goal is to see 4th Quarter up and running as efficiently as possible according to your needs. We will make 4th Quarter work for you!

4 Steps to Your Custom 4Q Solution:

Braided Matrix has a 4-step approach to customizing 4Q. We are available to perform or oversee the customization process through all four steps, and to assist you at every point along the way. We also offer 4D programmers source code training and materials to licensees of 4th Quarter source code.

• Step 1: Analysis

We create initial design specifications based on interviews with you in order to determine your needs and to understand your current system. This step yields a broad design outline, and rough time and cost estimates for the customization.

• Step 2: Specifications

We write a detailed plan of how the custom system will function and how it is to be implemented based on your specific business needs. It entails a thorough mapping of the required data, how you want them linked together, and any additional rules your business may need. This step yields a detailed blueprint for your system's structure, function and implementation, as well as a more accurate time and cost estimate.

• Step 3: Implementation

Implementing the blueprint involves customizing 4Q's code, creating custom forms, modifying existing tables, and linking existing 4D software to new subsystems. Our approach during this stage includes incremental testing, and accommodates ongoing changes to the design. At the end of this step the finished system is ready for installation.

• Step 4: Installation

The first step in installation is importing existing data into the new system. This requires extracting, reformatting and cleaning old data. It is then imported in stages, tested, and debugged. The new system must be configured, users familiarized with the new equipment, and data administration tasks defined. We can provide on-site user training and support as needed.

Braided Matrix, Inc. offers some of its services on an hourly basis, and others according to a fixed-cost schedule. Please contact us if you would like to know more about how we can help you customize 4th Quarter Accounting Solution to suit your unique business needs.
